## PROFILE

Energetic and passionate Junior Full Stack Web Developer with a solid foundation in JavaScript and experience in developing responsive web applications. Currently expanding my technical repertoire by learning Java, demonstrating a commitment to continuous learning and versatility. Recognized for my ability to quickly assimilate new technologies and concepts, I bring a proactive approach and collaborative spirit to every project I undertake.

## WORK EXPERIENCE

- **RBK-RebootKamp Tunisia** 2023 - 2024  
Fullstack Developer - LMS Project
  - **Frontend Development:** Built a MERN-based LMS using React, Redux, and JavaScript, with polished HTML/CSS and contributions to a JS testing microservice.
  - **Backend & Operations:** Developed backend with Node.js, Express, MySQL (Sequelize), and added real-time features via Socket.io for improved efficiency.
  - **AI & UI Design:** Supported AI module integration and created user-friendly interfaces using React and Material-UI.
  - **Team Collaboration:** Contributed to GitHub-driven development with code reviews and process optimization to meet project goals.
  - **Summary:** Gained solid web development experience with a focus on scalable architecture, efficient workflows, and team-based innovation.
- **Thesis project as a student - RebootKamp Tunisia** 2023  
FullStack React Native Javascript - Gighive
  - **GigHive:** GigHive connects freelancers with clients, providing a user-friendly platform for job matching. Freelancers can display their skills and apply for jobs, while clients post opportunities and select qualified freelancers. **\*Role:** As a team member, I was instrumental in managing the client interface, focusing on functionality and aesthetic design to improve user experience.
- **STARK Security Service, Qatar** 2022- 2022  
Security Manager
  - Responsible for developing, implementing, and overseeing security policies and protocols to safeguard company assets, personnel, and information. Manages physical security measures, risk assessments, emergency response plans, and compliance with legal standards. Collaborates with IT, HR, and executive teams to ensure a secure and resilient organizational environment.
